

CT20

ALL-TERRAIN ELECTRIC BIKE

COSWHEEL

9 ADVANTAGES THE NEWLY FULL UPGRADE

18650 Battery cell

200KG Load

750W Motor

3 Riding modes

5.0 All-terrain tires

Hydraulic disc brake

Hydraulic shock absorber

7-Speed Transmission

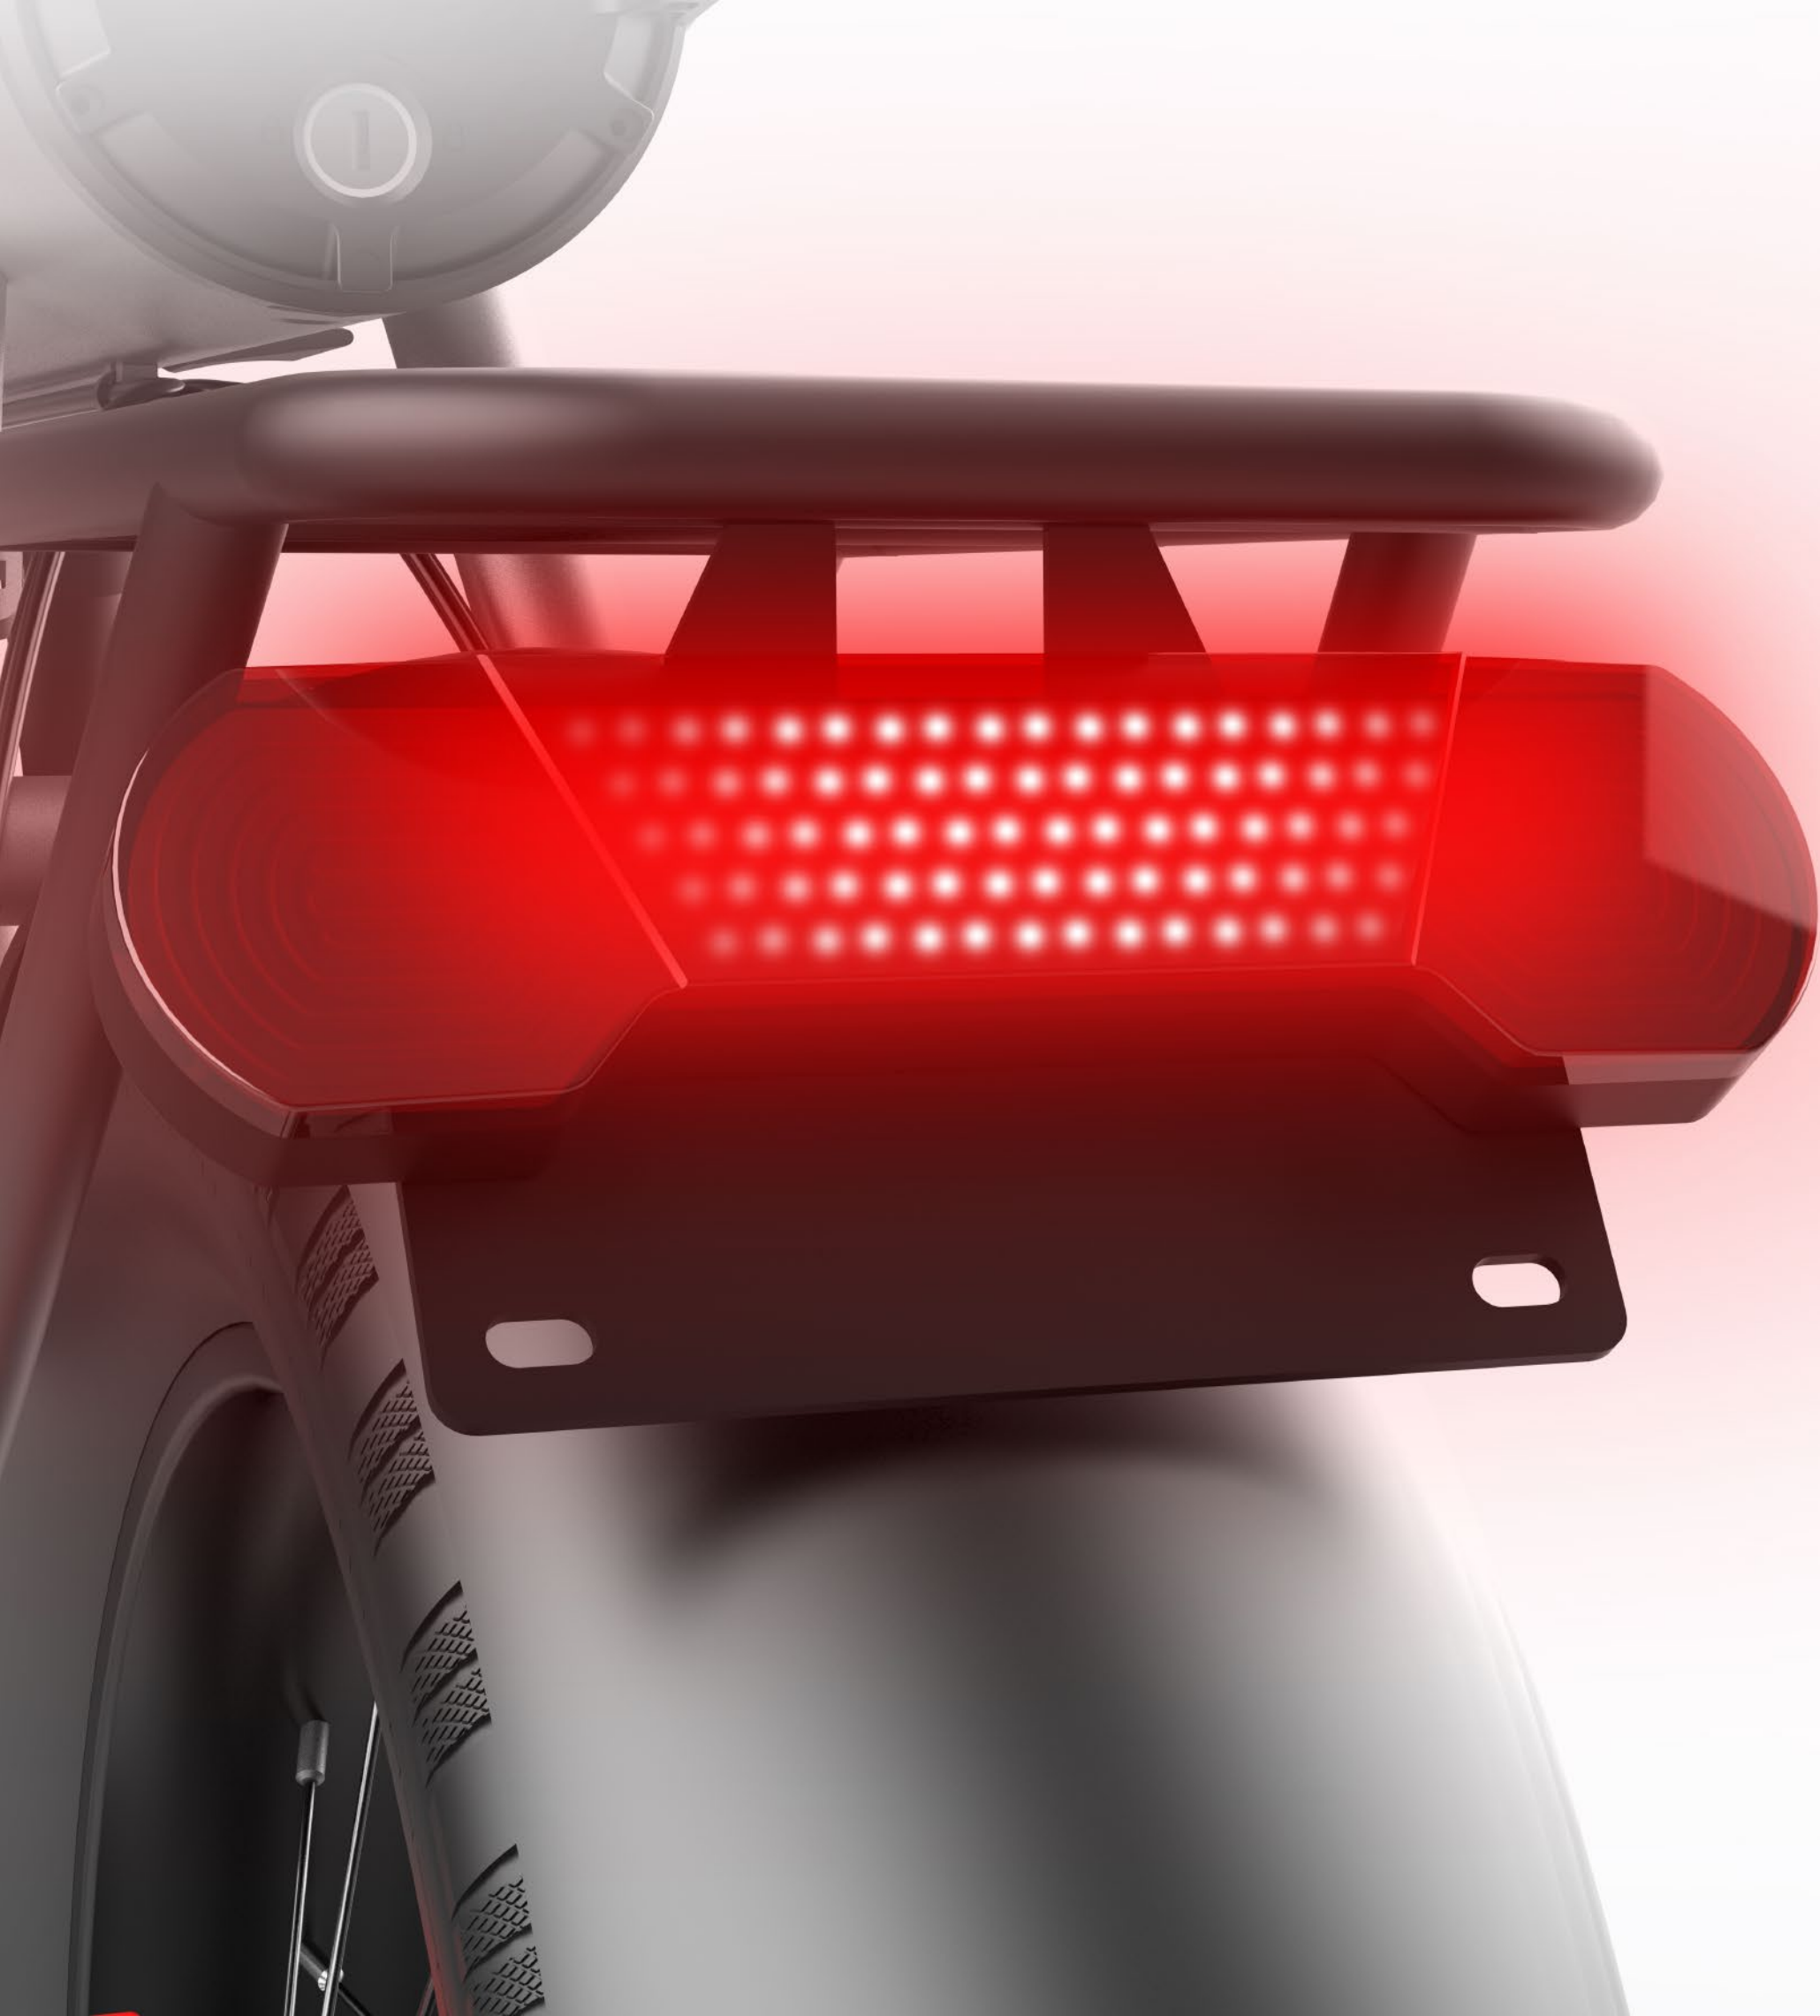

LCD colorful screen

LED ANGEL EYE

headlights Retro beautiful and practical

The wide-angle design of LED high-flow headlights illuminates a wider range. The luminous intensity of the light illuminates the surrounding area to ensure the safety of riding at night.

PATENTED HIGH-BRIGHTNESS SIGNAL LIGHT

Identifiable brighter lights at night for safety ride

LCD SCREEN

clearly visible at night

New UI interface, the easy-to-read data display is more accurate; Equipped with LCD screen sealed and waterproof, you can see clearly in strong light environment

750W POWERFUL
motor Full of speed and passion

High-efficiency and energy-saving technology for motors for high-density and precise calculation with high-density sensors. Speed and passion coexist, and the power is surging, so that you can also experience the feeling of back-pushing for going uphill

RACING GRADE HYDRAULIC BRAKES
High-speed braking can also stop in seconds

 **2.5M**

THE DRY BRAKING DISTANCE IS ABOUT

 **4.0M**

THE WET BRAKING DISTANCE IS ABOUT

Note: The result is obtained by riding at a speed of 20KM per hour.

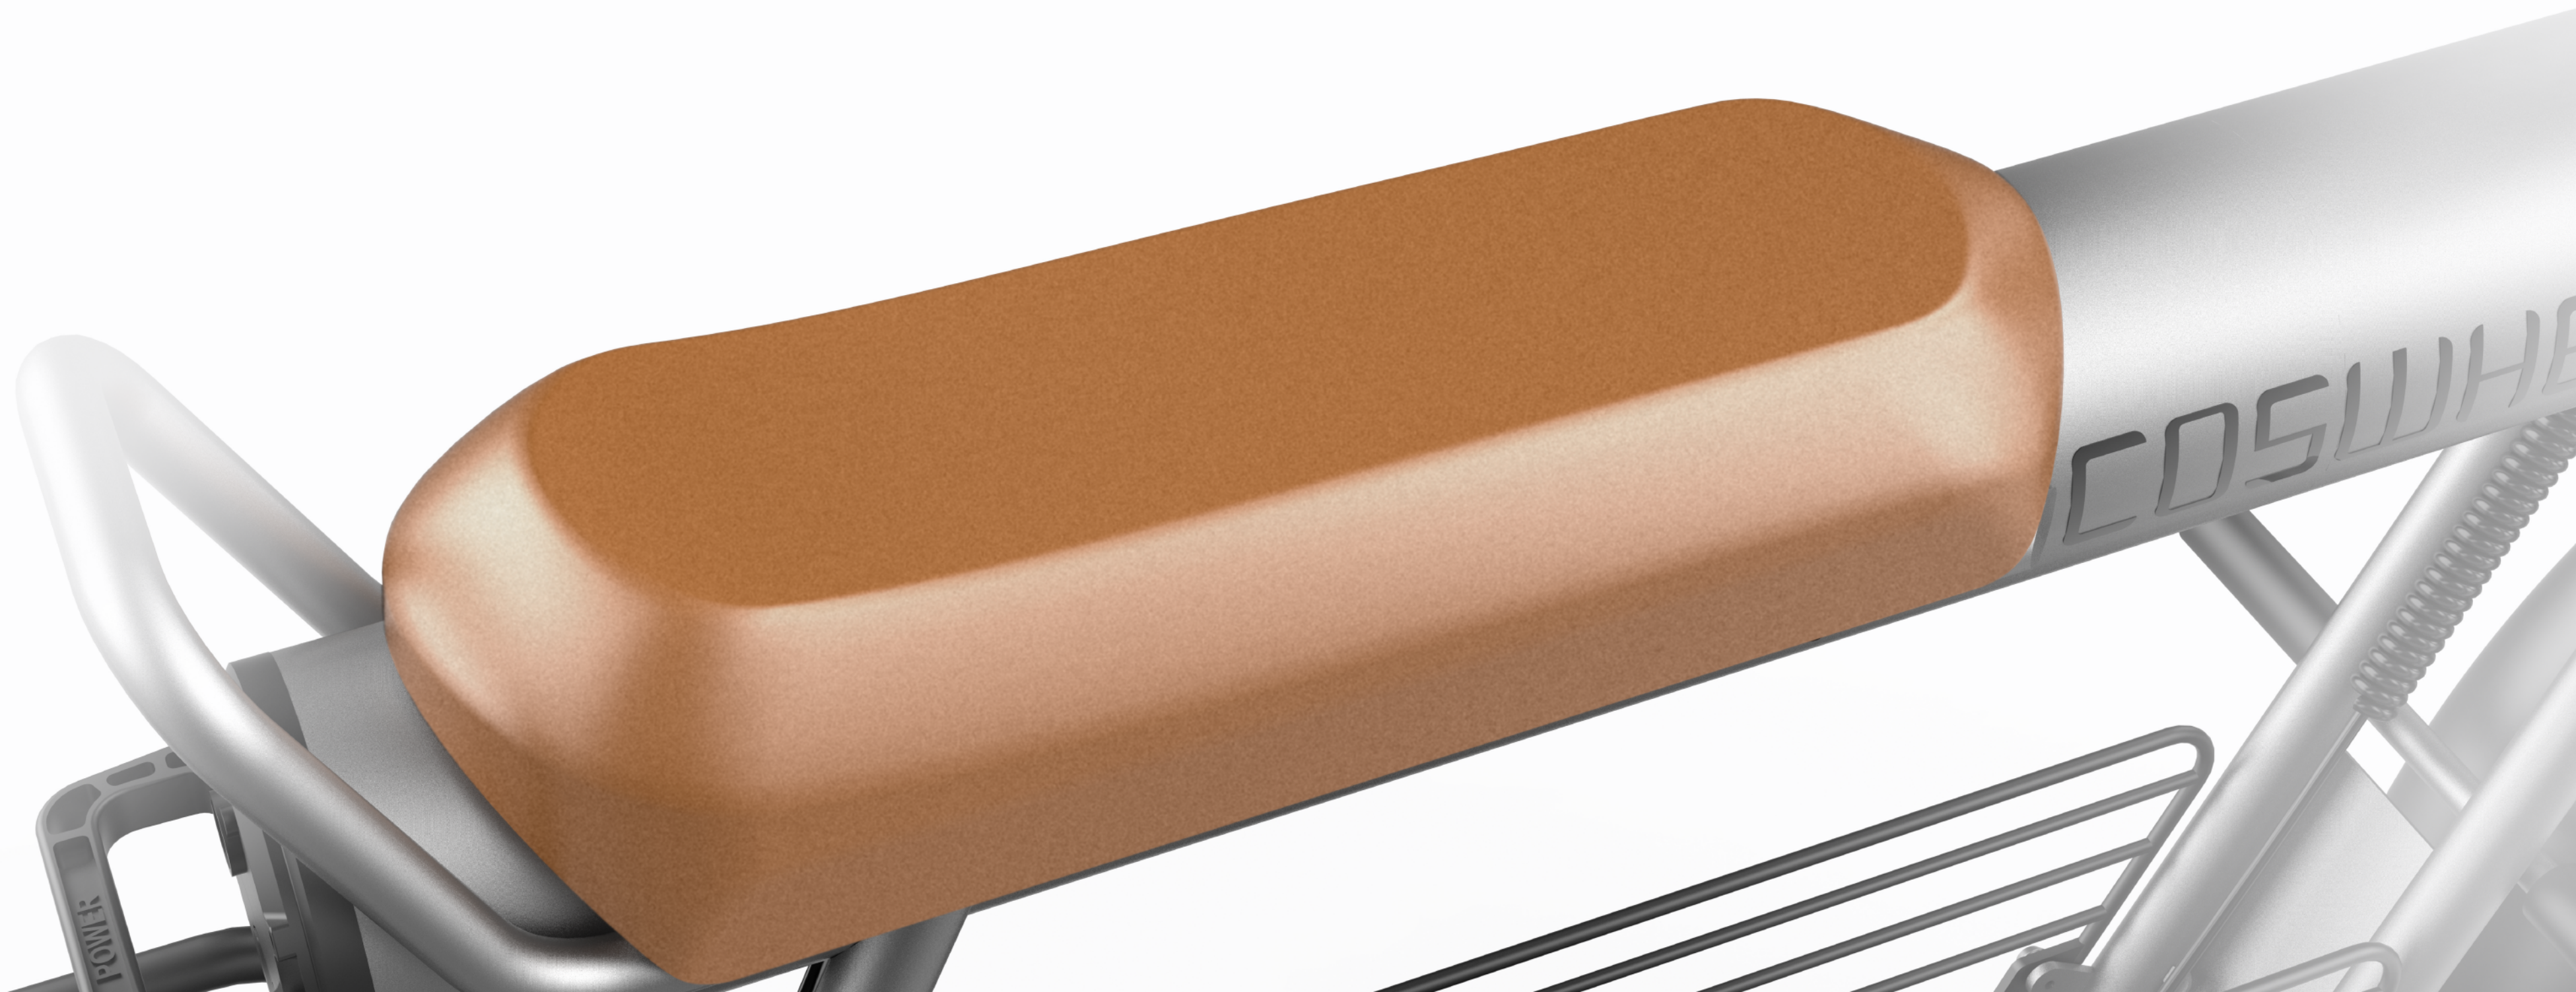

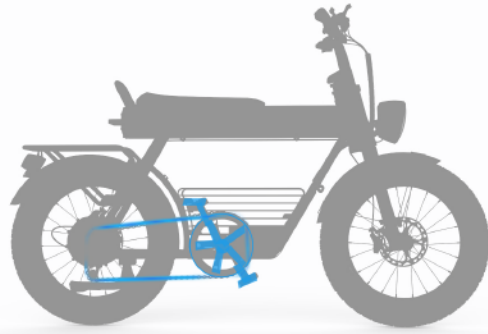

TWO CHARGING METHODS WATERPROOF

The battery is disposed under the seat, two methods of charging with removable battery: direct charging and remove to charge convenient to remove the battery and charge or inserting the power supply into the frame to charge directly

NOT TIRING FOR LONG RIDES SOFT PU MOUNTAIN SPECIAL SADDLE

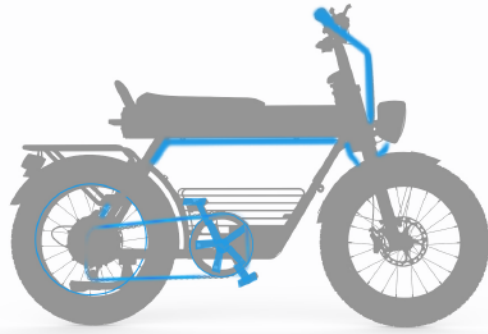

soft PU fabric on the surface,Excellent heat dissipation and ventilation effect, high elastic memory foam inside With the ergonomic design, better shock absorption effect to release the pressure on the buttocks.Max Load 200KG, It is also comfortable and stable for two or three people

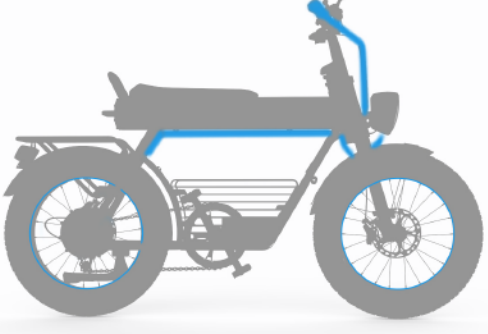

Manpower mode

without turning on the power
Just press the pedal to ride

Assist Mode

Turn on the power, no need to
twist throttle, just move by pedalling

Electric mode

Turn on the power and directly
turn the handlebar to start the bike

Three riding modes for various scenarios

Three riding modes, pure electric, assist and manpower mode. Efficient and high quality 7-level shifting system for manpower riding mode provide a fast and furious experience as mountain bike.

Product parameters

	20GP: 70pcs
	40GP: 140pcs
	40HQ: 170pcs

1160mm

680mm

840mm

620mm

1760mm

PRODUCTS PARAMETERS CONTRAST:

COLOUR	 OEM≥100
Max distance	50km/80km/100km/120km(20km/h)
Top Speed	45km/h
Display Information	LCD display:Speed, Headlight,Fault code.
Vehicle Weight	About 40kg
Max load	150KG(Safe load≤120KG)
Size	176X68X116cm
Tyre	20X5.0 inches pneumatic tyre
Motor Parameters	750W brushless motor
Battery	48V/15Ah.20Ah.25Ah.30Ah
Charging Time	About 7- 12h
Braking Parameters	Double hydraulic disc brake(Front and Back), 4 meters braking distance (Speed < 20km/h)

YOU CAN

infinite possibilities
